Compassionate Patient Care

In collaboration with **PROVIDENCE** Health & Services

Services

Advanced CT scanning

The newest CT technology provides quick, yet extremely detailed, CT exams.

Digital fluoroscopy

The body can be viewed with movie-like images by using advanced digital fluoroscopy.

Digital mammography

Our digital mammography system provides exceptionally sharp images and allows zoom-in on tiny details.

Magnetic Resonance Imaging (MRI)

Our state-of-the-art MRI technology offers some of the highest resolution diagnostics available today.

Ultrasound

The latest in 3-D and 4-D ultrasound technology is available at both of our locations.

X-rays

Digital x-rays provide fast, high quality images.

The CMI Difference

Calm and comfortable environment

We go to every length to make CMI a place where patients feel at ease.

Prompt delivery of images and findings

Our all-digital, online system offers quick physician access to patient images and results.

Expert radiologists

We offer exceptional radiology expertise with board-certified, fellowship-trained radiologists in a wide range of specialties.

Same day/next day appointments

Physicians and patients can conveniently schedule appointments through the online system.

We understand how important high quality radiology can be for overall health. Simply put, our lives can depend on it. That's why we not only offer the most technologically advanced imaging resources in the area, but also an unprecedented level of exceptional service. Visit our Web site to find out why we're the physicians' choice in medical imaging at centerformedicalimaging.com.

“Starting with the receptionist to the x-ray tech, the service was fantastic! If I had to give the Center of Medical Imaging a grade it would be an A+. Thank you!”
